EDUCATION

West Virginia University | Morgantown WV

B.S. Game Design & Interactive Media

Expected Graduation: May 2027

TECHNICAL SKILLS

Coding Languages - C#, HTML/CSS, JavaScript, XAML

Engines/Platforms - Unity, Git, Windows Forms, WPF

- 2+ years Photo/Video Editing using [Davinci Resolve](#), [Gimp](#), [Photopea](#), [Aseprite](#)
-

WORK EXPERIENCE

Technical Designer | MonRiverGames | August 2026 - Present

- Movement gameplay mechanics programming
- Level concept & design

AI Training Open Contractor | DataAnnotation (Remote) | May - August 2026

- Evaluating and improving large language model outputs across, reasoning and writing tasks against detailed quality rubrics
 - Applying structured criteria to rate response accuracy, instruction following and quality
-

PROJECTS

“[Derby](#)” (Aug, 2026 - Present) Unreal Engine, 3D | [Studio Team](#)

- Created Movement Mechanics Blueprinting
- Implemented Custom Camera Logic

“[SteamSmith](#)” (Dec, 2025 - Aug 2026) Unity 3D | Solo Developed

- Developed a first-person Unity game featuring inventory, dialogue, diegetic crafting, enemy Patrol and Wandering AI, Separate large enemy AI; UI, lighting & audio systems.
- Designed a modular interaction system, diegetic crafting mechanics & tutorial progression system driven by a state machine.

“[Monster’s Breakfast](#)” (April 2026) Unity 3D | Team Developed

- Programmed object interactions and minigame logic
- Debugged and refactored teammates' code across a shared codebase, resolving integration conflicts between independently built systems (UI, animation, minigames) to ship a stable, playable build.
- Coordinated with a 4 person team to scope the project, match roles to individual strengths, and deliver a complete game on a 4 week deadline.
- Created a 3D environment and set dressing that established the atmosphere and guided player navigation.
